Indian Buildings Congress

Mid Term Session & National Seminar on "Innovations in Built Environment" & 108th Governing Council Meeting

Indian Buildings Congress (IBC) was founded on 1st September 1992 and registered as a society on 29th March 1993, with its headquarters at New Delhi. The vision of the organization is a built environment, which is affordable, aesthetic, environment friendly, cost effective & competitive, technology driven Built Environment capable of meeting needs of the Indian masses. In order to meet its objectives, IBC is striving continuously to bring all professionals connected with built environment on a single platform so as to form collective opinion on subjects related to Building Industry and present for consideration of the Government. Over 6800 individual members and over 98 Institutional Members both in the Public and Private Sector, are members of IBC.

Mid Term Session

IBC will be holding the Mid Term Session and National Seminar on "Innovations in Built Environment" at National Academy of Construction (NAC), Cyberabad, Hyderabad, Telangana on 11-12 April, 2025 and 108 th Governing Council Meeting of IBC on 13 April, 2025 at Engineering Staff College of India (ESCI), Gachibowli, Hyderabad, Telangana. Exhibition will also be arranged at NAC. The Sub Themes of the Seminar are: 1. Smart Technologies, Equipment and Digitization 2. Sustainability in Built Environment 3. Technological Interventions in Mass Housing 4. Innovative Construction Materials and 5. Safety and Construction Welfare Measures.

Members of IBC and Professionals of Govt. Deptts, Housing Boards, Development Authorities, Town & Country Planning organizations, State PWDs, Teaching & Training Institutes, Technical Universities, Builders, Developers and all other including Engineering Students interested in building management are cordially invited to participate.

Objective of The Seminar

For any Nation to develop and compete in the global scenario, faster development and construction of infrastructure projects in different disciplines like buildings, roads, airports, tunnels, water supply, electrifications etc. is necessary.

On the call of Hon'ble Prime Minister of India, pressing on 'Vocal for Local', new Industrial units are coming up throughout the country. To meet the industries' requirements for commercial & residential space including mass housing and demand of infrastructure has been realised in the country.

The Construction Sector has, therefore taken a great leap in the new Millenium. Development of innovative, technologies innovative construction materials, chemicals, computer aided designs, smart technologies, digitilisation, highly sophisticated construction equipment's and machinery have revolutionised the construction sector. Recently, substitute of even reinforcement bars has come in the market, though with the limited use to begin with.

The main purpose of this Seminar is to bring together all the stake holders connected with the built environment including Researchers, Professionals, Administrators, Financiers, Planners Developers, Architects and Engineers of all disciplines, Horticulturists and manufacturers of building materials & machinery on a single platform to discuss major innovations in the built environment and deliberate in detail on each of the sub-themes.

New technologies are critical in evolving sustainability solutions with respect to traffic transport management, urban mobility and other infrastructure requirements besides changing script of urban planning & development in the form of smart cities. Artificial Intelligence, Machine learning (MI), GIS/GPS etc. are also affecting the urban process of smart planning & systems.

Therefore, we have an opportunity to assess and realise true potential by bringing professionalism and global expertise keeping in mind safety & costs besides welfare measures of construction workers to improve their living conditions.

For components & huge data involved in the projects common digital platform is the necessity for smooth interaction of all components of the project and is considered as demand of the day.

The traditional construction materials are depleting fast and their carriage from far off places to the places of actual construction site /requirements is increasing heavily, the use of innovative material without causing much air pollution is also necessary as the air pollution is a matter of concern these days particularly in the densely populated cities.

The end objective of the Seminar is to disseminate the knowledge among all the Stakeholders including the agencies responsible to implement the recommendations emerging out of the discussions & interactions with reference to all the components referred to above.
